## MEDICAL MEN ADDRESSED BY DR. C. S. LEWIS

"Discoveries in Scientific Medicine" the Subject

### WORKS DISCUSSED

Lives of Three Outstanding Scientists Related by Speaker

"The field of Scientific Medicine may be represented by a canvas composed of many panels, each bearing testimony to some great discovery," were the opening words of the address, delivered before the Medical Society last night by Dr. Slater Lewis. The subject chosen was "Great Discoveries in Scientific Medicine," and the speaker's ability to lecture on this topic as well as his ever-ready wit went to make the meeting a great success.

Dr. Lewis pointed out that men had been driven to experimentation for various reasons; some for the love of Science in itself; some possessed of inventive genius; while others plodded along slowly from point to point without brilliant discoveries, for the love of the work. A conjunction of love of Science and work are characteristics of the great masters who have come down in the annals of history.

For the purpose of showing the growth of scientific thought, the speaker took as examples the works of three great Scientists, von Leewenhock, Edward Jenner and Louis Pasteur. The first of these, von Leewenhock, was born in 1652 in Delft, Holland. In early life he proceeded to Amsterdam, where he became a draper's assistant. Later he returned to his home and became chamberlain to the Sheriffs, a position which did not require much work although it gave him sufficient salary to enable him to carry on his research. He devoted his time to lens-grinding and the setting up of small microscopes with which he observed a great many natural processes hitherto unknown. He was the first one to demonstrate the crystalline structure of the eye. Probably the greatest of his discoveries was the method by which blood was communicated from the small arteries to the small veins. Harvey had described the flow through the larger vessels but at the end of the

## EXPLORER OF FAR NORTH WILL SPEAK

Dr. Nansen Will be Heard After Degree is Conferred

### AT CONVOCATION

Principal Will Also Address the Gathering This Afternoon

This afternoon at 5.15 in the Convocation Hall of the Royal Victoria College, McGill will honour a world famous explorer in Dr. Fridtjof Nansen. Dr. Nansen is not only an explorer, but also an ex-ambassador, an author, and an eminent authority on Oceanography at the University of Christiania. He has travelled very extensively and is certainly one of the most notable world figures of today. During the last twenty years of the last century he spent a great deal of time in the far North, and reached a further point north than had ever before been obtained. He gained the experience in those years that he later used in his study of ocean tides and currents. He underwent hunger and hardship then as he did later in Russia when directing the Russian Famine Relief. And it may be said of him that he has had more experience of all kinds in his varied life than many men ever read about. He is a great advocate of the League of Nations, and a keen observer of European and world affairs. He exerted a great influence in the separation of Norway from Sweden. After the war, he went to Moscow and personally directed operations for famine relief, being in the centre of the misery and confusion that existed

Monday, Dec. 17.  
Maritime-Western Dance.  
Mock Parliament.  
Bliss Carmen at R.V.C.

## UNION HOUSE FORMAL TO BE GALA AFFAIR

Tickets on Sale at Tuck Shop Are Going Fast

### ADNEY'S ORCHESTRA

There Will Be Only One Large Supper Sitting

Tickets for the Union House Formal on the fourteenth, are now on sale at the Tuck Shop. Since it is the first of the month, the finances of the student body should be in very fair shape and it is expected that the tickets will be disposed of at a very fast rate. Possibly one half of them have already been sold.

One important feature of this dance is the fact that there will be but one large supper sitting. This is a great improvement upon all such affairs of the past.

Hugh D. Robertson, Arts '24 has been awarded the prize, one free ticket to the dance, for the best program design. The decorations will be entirely new and of a style altogether different from the usual. The favours also will be in a novel form. Adney's orchestra will be on hand, which is enough to assure that the best brand of music will be supplied. At present the members are preparing several new numbers for this occasion.

The Union House Committee are sparing no efforts to make this affair an unqualified success.

### Christmas Issue on Dec. 20.

Prizes will be given for best Christmas poem, best special article and 2 best photographs of winter scenes about the university. The Daily reserves the right to use all work submitted, which must be in by noon, Dec. 14th. Full details will be announced to-morrow.

"I haven't the heart to take it," said the bridge fiend as he discarded a club.

## SCIENCE MEN HELD DINNER IN THE UNION

Highly Successful Gathering of Science Undergrads

### COL. DENNIS SPOKE

Representatives From Sister Universities Were Present

About 100 members of the faculty of Applied Science were present at the Annual Banquet of the Science Undergraduate Society, Wally Mitchell, president of the Society, occupied the chair.

The speakers of the evening were Fraser Keith of the Engineering Institute and Col. Dennis, chief Commissioner of the Canadian Pacific Railway. The faculty was well represented by twelve members of the staff. Also the universities of Montreal, Queen's and Toronto sent a member of their engineering departments to the function. Carswell, representing Varsity, Roberts, Queen's and M. Ethier of l'Ecole Polytechnique de l'Universite de Montreal. Dean Adams, unfortunately was unable to attend.

The banquet was held in the hall-room of the Union. The hall still had the distinctive decorations of the Junior Prom., but instead of the words "Junior Prom." the word "Science" was hung on the wall. Tables, tastefully decorated with red and white ribbons and carnations, were ranged round the spacious ballroom leaving an open space in the centre.

Adney's orchestra provided the music for the evening, entertaining the banqueters with the latest popular airs. That the efforts of the orchestra were greatly appreciated was evident from the repeated demands for "more". During the evening, Crocker's new McGill march was played and enthusiastically received, the assembled plumbers joining in heartily. Kathleen Olds delighted the gathering with her dancing, being called back again and again. After each performance she was immediately surrounded by a crowd of young men eagerly trying to get her autograph. The Union caterer outdid himself in an effort to please. The menu was entirely satisfactory to the most fastidious taste; while the service was perfect. Waiters correctly liveried

## INTERESTING ADDRESS BY PROF. AGGREY

Educated Race Must Civilize Africa

### DEBT TO MCGILL

Says There is Very Much Unrest in Africa To-day

"To some people the map of Africa looks like a pear; to others it looks like the leg of ham from which anyone can cut a slice; but to me Africa is shaped as a great interrogation mark," said Prof. J. E. K. Aggrey, M.A., in an eloquent address at Strathcona Hall yesterday afternoon which held the attention of the audience throughout. In his speech, through which many bits of humour were interspersed, he made a most impressive appeal for "co-operation of the races."

Prof. Aggrey is a native of the African Gold Coast who has gained his M.A. and is at present studying at Columbia University.

"Like the sphinx," he said, "Africa is asking questions of all races of all the continents and these have not yet been answered." To-day, he stated, there is great unrest in Africa as in the whole world. There are great social problems to be solved and when they are solved, the world will be a better place.

"Glory to God in the highest, peace on earth, good-will toward men," is the Christmas message, but Prof. Aggrey said he would like to change its order and put the "good-will toward men" first. If we have good-will toward men, then we shall have "peace on earth."

## ONE WHO HAS HELPED THOUSANDS

To-day there is a visitor at McGill, whose name has rung around the world many a time, both because of his personal heroism and his magnificent sacrificial labours for stricken suffering humanity. Dr. Nansen, Arctic explorer, author, ex-ambassador, relief worker and scholar, is this guest and he is one worthy of the greatest welcome, which the undergraduates of this university can give. And, as we know from the past, when the students take a man unto themselves, they do it with a spontaneity and warmth of heart, which cannot be excelled by any other group of people in the world.

In the earlier portion of his life, Dr. Nansen was severely tested by the cruelties and hardships of the far and frozen North. In two outstanding expeditions he won undying fame for himself and his name will live forever among those who have chanced all in the gamble of venturing into the unknown. But though he has accomplished a great deal in the opening of unexplored regions, his most worthy contribution to mankind has been made during the past few years, since the saw-bayonet, War, gashed the face of Europe. The wound that was left was deep and wide and it is far from healed as yet. But a lot of work has been done and Dr. Nansen is outstanding among those, who have greatly helped by the practical application of the spirit of international brotherhood. With boundless energy, he has devoted himself to the herculean task of alleviating suffering among the peasants of the Volga, as well as in the ranks of refugee Armenians and Greeks. The one-time explorer is carrying on his labour under the League of Nations and his present visit to the Dominion is for the purpose of pleading the cause of those who have suffered and are still suffering.

This afternoon the university will show its appreciation of our visitor's contributions to the life of the world by conferring upon him the honorary degree of L.L.D., and upon special request, the recipient has agreed to give a short address to the undergraduates of the university.

Dr. Nansen, in the words of the Toronto Globe, "is a servant of mankind, and one of its glories as well." Students, because of their knowledge of the sacrifice invariably involved in undertakings of any degree of magnitude, are not often lacking in the sense of appreciation and if we are no exception at McGill, the Convocation Hall in the Royal Victoria College will be far too small to accommodate all those desirous of attending. And at the best we can only do all too little to honour one who has done so much.

## CONDENSED COMMENT

Many will be glad to hear to-day that an agreement has been reached with Dartmouth University for a football fixture next autumn. This resumption of international intercollegiate rugby will be welcomed in many quarters, as the games in the past have greatly helped to cement the relations between McGill and our sister universities across the invisible border to the south.

Facilities, classes or clubs contemplating banquets are reminded of the enthusiasm with which Science students are commenting upon last night's banquet in the Union. Due to the work of the executive and the co-operation of the Union officials, everything was of the best. Which all goes to prove that there is no reason whatever for not holding the majority of college functions within the precincts of the university.

In order that the Union House Dance may be arranged with the least possible difficulty, those who intend going are asked to co-operate by buying their tickets immediately. Do not wait until the end of the week but do it now.

"Bones" Little and Errol Amaron will captain the rugby and basketball squads respectively. The men who have been thus honoured are exceptionally well known about the university and the selections are such as will not be questioned. The tasks which have been set before the two athletes are not easy and we wish them the best of success in their new positions.

The McGill Women's Intercollegiate debaters are to be congratulated on their victory at Kingston on Friday, when they reversed last year's result and defeated their old rivals—Queens, in one of the most spirited debates of the women's intercollegiate series. It is unnecessary to stress the value of such friendly rivalry between the sister universities as is evidenced in the intercollegiate debates, and it is with much pleasure that we look forward to a return visit from the Queen's women debaters.

Mama's in the kitchen,  
Washing out the bottles,  
Sister's in the pantry  
Putting on the labels,  
Papa's in the cellar  
Mixing up the hops,  
Brother's on the front stoop  
Watching for the cops.

"Why keep that school girl complexion?" asked the Senior as he brushed off his lapel.—Jx.

A voice from Heaven whispered an inspiration into our ears just the other moment. We were wondering where to raise the money for our annual Christmas gift list, when this brilliant idea came upon us. We have therefore resolved, (this to our lady friends) to compose a poem of undying love to each one of you, which we will send in lieu of the usual Yuletide present.

# NOTICES

**SCIENCE '26 INDOOR BASEBALL**  
Will the following men please be on hand at five o'clock at the High School gym., for the game with Med. 25: Scanlan, Tatley, Upton, Munro, McClung, Bremmer, Costigan, Craig, and Darling.

Will the following men who acted as Groundsman and Ushers for the Rugby games please call at the office of the Athletic Manager for their money before Friday:

J. Ambrose, C. M. Anson, F. McBrown, C. R. Garson, D. M. McCrae, W. A. Milligan, D. F. Murray, C. L. Pope, G. L. Routledge, G. Roberts, M. R. Stalker, W. Sweetman, J. C. Simpson, C. R. Armstrong, G. Hill, G. A. Sherman, D. B. Johnson, R. B. McLeod.

## ARTS PRES.

The Presidents of the various years in Arts are requested to see that a representative to the Arts dinner committee is appointed from each of their respective years. This should be done before Friday of this week. Please advise the Secretary of the Arts Undergrad. of the names of these representatives immediately they are chosen.

## MANDOLIN CLUB

The picture of Mandolin Club will be taken to-night, Dec. 4th at 7.15 p.m. at Notman's 255 Peel St. Members are requested to be present and if possible to wear a tuxedo. Those who cannot do so, please come and wear a dark suit with wing collar and black bow tie. A practice will be held at Peate's afterwards so everybody must be on hand, as work will be started on the record.

## MECHANICAL CLUB

Permission has been obtained for a small party to visit the Longue Pointe Works of the Canadian Steel Foundries, Ltd., on Wednesday, Dec. 5th. The party will leave the Union at 2.00 p.m. sharp, and will take a St. Catherine-Maisonville car and transfer to a Notre Dame car.

## BOXING CLUB

Faculty eliminations to be held in next two weeks. Entry list posted in Molson's Hall will be open until Thurs. Dec. 6th. All men sign up as soon as possible.

## WESTERN CLUB

Picture of Western Club Executive will be taken at Notman's at 3.15 p.m. Wednesday, Dec. 5th.

## HOCKEY PRACTICE

There will be a workout for all Hockey players at the Union Ball Room at 5. on Tuesday, Wednesday, and Friday.

Tickets for McGill—M. A. A. A. Senior Basketball game now on sale at Union.

## INDOOR BASEBALL

Tuesday, Dec. 4th., 5-6, Med 25—Sc. 26, 6-7, Arts 25—Med 27.

## STUDY GROUP

The "Industrial Discussion Group" will meet this afternoon at 5 p.m., Room F, Strathcona Hall, when last week's discussion on "Labour-Saving Machinery" will be continued. All Science students interested are invited to attend.

There will be a meeting of the Theological undergrads. to-day at one o'clock in Divinity Hall. The following are asked to be present:—Livingstone, Moore, Egerton, Gaukrodgers, Andrews, Siscoe.

## OLD SCOUTS

Old Scouts are reminded that there will be a meeting of the Club on Thursday, Dec. 6th., in Room B, Strathcona Hall at 8 p.m. Anyone interested will be welcomed.

## CERCLE FRANCAIS

There will be a meeting of the Cercle Français tomorrow evening at 8.15 in the reading room of the Union. The Intellectual Powers of Women will be discussed. It is hoped there be a large attendance.

## SKI CLUB

There will be a meeting of the Executive of the Ski Club in the Union to-day. Will all men who have previously done any speed-skating please attend.

## FENCERS

There will be a very important meeting of the Fencing Club in the Union at one o'clock to-day. The business to be discussed is the offer from Dartmouth University to send some fencers here to compete with McGill fencers. All members of the club are strongly urged to attend the meeting.

## FENCING

The fencing eliminations are to begin this week, and they are to be held in the field house. At five o'clock on Thursday the Science and Law eliminations will be held, while

the Arts, Medicine, and Commerce eliminations are to be on Monday at five. The following Science and Law men are asked to turn out: Helfield, Pangman, Maxwell, Monroe, Mathewson, Johnson, Converse, Durely, McCombe, Coleman, and Cossett. The following are the Arts, Medicine, and Commerce men: Brodie, Wolfe, Lyons, Knece, Bloomfield, Smith, Korenberg, Doushkeas, Kurle, Latham, Roncarelli, White, Alkman, Taylor and Matheson. It is believed that last year's team will not figure in the eliminations.

## GLEE CLUB

Every member be on hand at five o'clock to-day in the Convocation Hall of R. V. C. for the special Convocation. Do not forget to bring your song books.

## ARTS '26 INDOOR BALL

To-day there will be a game with Meds 27 at the High School Gym. The following are asked to be present: Armstrong, Miller, Happ, Allison, Stewart, Hanson, Eddy, McPhail, Blundell, Nairn.

## CHESS

Prof. Slack will give a demonstration on current chess problems to-night in the lounge room of the Union at eight o'clock. The student-professor match is postponed two weeks. There is to be a regular meeting of the Chess Club to-day at five o'clock.

## INTER-CLASS HOCKEY

All classes which intend to enter the League this year, and which were not represented at the meeting held Wed. should communicate immediately with the undersigned.

A. L. Morris, Mgr.  
Up. 8633.

## McGILL CHESS CLUB

The members of the McGill Chess Club who have not yet paid their dues will help the Club by paying them at once to the Secretary, A. F. White. Until these are paid, the chess tournament cannot be completely arranged.

## CLASS BANNERS

Will the person who has the class banners of Commerce 25 and R. V. C., kindly leave them with Mr. F. Fletcher at Union. We would appreciate immediate action in this regard.

## WRITE-UPS

Secretaries of Clubs and Societies are requested to hand in write-ups for the Annual at once to any member of the Annual Board, or leave them at the Union addressed to the Editor of the Annual.

## PHOTOS

All Juniors who have not had their photos taken for the Annual must do so at once as those who do not do so this week will be excluded from appearing in the Annual.

## JUNIORS

Please return biographies at once to Faculty representatives on the Annual Board.

## SNAPSHOT COMPETITION

Student photographers are reminded that they may obtain a free Annual by handing in the largest number of snapshots of interesting college incidents. For particulars see E. K. Boulton, Photograph Editor, Plat. 351.

## HISTORICAL CLUB

The Fourth meeting of the Historical Club will be held this evening at the residence of Jas. D. Briereley, Esq. 623 Sydenham Avenue, Westmount (just below the Boulevard). Speaker: Mr. Terence, W. L. MacDermot, M. A. (McGill and Oxon) former Rhodes scholar, now of Dept. of History. Subject: "The study of History at Oxford."

Dean Thornton will deliver a lecture to the Young People's Society at the B'nai Jacob Society Synagogue, Fairmount St. West, on Wed. evening, Dec. 5th at 8.30 p.m. Subject: "Some things in Literature."

## Armstrong Cork & Insulation Co., Limited.

Cold Storage, Insulation, Etc.

## UNIVERSITY CHURCH SERVICE ON SUNDAY

Prof. Harry F. Ward of Union Theological Seminary to Speak

The first University Church service of the year will be held in the McGill Union next Sunday morning at eleven o'clock. Professor Harry F. Ward of Union Theological Seminary, New York will be the speaker. Principal Fraser will conduct the service and Sir Arthur Currie, Principal of the University will read the scripture. Professor Ward who will speak at the Peoples Forum; also in the evening, preaches to the students on "God and My Neighbour."

Harry Frederick Ward was born in London England in the year 1873, he was educated at the University of California and North Western from which college he took his B.A. in '97, and in '98 was granted his M.A. from Harvard. He then became head resident of the North Western Settlement. From 1899-1911 he held a pastorate in Chicago, and in 1913 became professor of Social Service in the Boston School of Theology. Professor Ward is now professor of Christian Ethics, Union Theological Seminary, New York, and also editor of "Social Ministry." He belongs to the fraternities Delta Tau Delta, Phi Beta Kappa, Sigma I.K.K.O. Professor Ward is one of the outstanding prophets of the time, he got his first lessons in the social gospel in the stockyard district of Chicago, and continued his education along this line in a number of pastorates in downtown neighbourhoods and industrial districts. For years he was professor of Social Service at the Boston University School of Theology, now occupied by Professor D. D. Vaughan, and is now identified with the great independent Union Theological Seminary of New York City. He is perhaps the best informed Protestant Clergyman on the labor question, having had a long and widespread acquaintance with labor organizations. He has always been a much sought speaker throughout the country and is the author of such books as "The New Social Order," "Poverty and Wealth," and the Labor Movement.

At the service on Sunday their will be a representative choir and a good orchestra to lead out the singing.

Harry:—This report says that Farley was wounded in the fray.—Ex.

## HISTORY EXTENSION COURSES

On Thursday next, Dec. 6th., 5 p.m. Prof. W. T. Waugh will give an illustrated lecture on Notre Dame de Paris and Westminster Abbey in Strathcona Hall. The last of the Anglo-French series will be given in the R. V. C. on the following Thursday afternoon, Dec. 13, with the subject: "Henry V and Jeanne d'Arc." The University and public are cordially invited.

## THE CAPITOL

To all the true lovers of the silver screen, the programme offered this week at the Capitol is a particularly interesting one, in that it presents a picture which has considerable of the mysterious included in it. The title of the feature is "Ponjola," and the picture is an adaptation of the novel of the same name by Cynthia Stockley, which has had a wide circulation.

The title role is played by Anna Q. Nilsson, who during a great part of the picture is disguised as a man. The scene opens in Paris, with the dejected heroine about to throw herself into the Seine; she is saved and given a new outlook on life by a young Rhodesian. She then adopts her male disguise, and follows the hero to his native land, where she does all in her power to assist his failing fortunes, even going to the extent of facing a murder charge in his place. The climax of the story takes place when a clever lawyer discloses the identity of the heroine, and the lovers are happily united.

The company is a very strong one, and besides Miss Nilsson herself contains James Kirkwood, Joe Kilgour, Bernard Randall and many others. Tully Marshall, who also plays a role in the "Covered Wagon," is seen as the titled manager of a mine.

There are many scenes at the mine which lend unusual interest to the production, as do those which introduce crowds of South Africans in their native costume.

The Capitol Grand Opera Company rendered "Echoes from Grand Opera" in admirable fashion, and the Overture, which was the "Hungarian Lullaby" by Kolabala, was also very pleasing.

"Where's Jimmy?" asked the head of the house, coming home from work. "He was very naughty," replied his wife, "I sent him to bed for swearing."

"Swearing?" roared the indignant father. "I'll teach him to swear!" and he rushed upstairs. On his way he fell over and for some minutes his voice resounded through the house.

Then Jimmy's mother called: John, I'm sure Jimmy has heard enough for the first lesson.

The superstitious scholars of the Middle Ages agreed, after much argument, that the enemies of mankind were (1) women, (2) devil, (3) drink.

## BASKETBALL

Freshman-Sophomore Inter-Class Basketball League Schedule:

Wed.—6.30 Theol. II vs. Arts II.  
—7.15 Pharm I vs. Sc I.  
Fri.—6.30 Depts II vs. Com. II.  
—7.15 Depts I vs. Med. I.  
Sat.—2.30 Theol. II vs. Sc. II.  
—3.15 Arts I vs. Sc. I.  
—4.00 Com. II vs. Med. II.

All games are to be played exactly on schedule and each team must have a Captain and Manager.

(Continued on page 3)

## RUGBY TEAM WILL MEET DARTMOUTH

Teams Will Play Under American Rules

### EARLY NEXT YEAR

Syracuse Was Unable to Make Arrangements for Game

The McGill rugby football team will play Dartmouth College next fall on Oct. 4th, in Hanover N.H. An agreement to this effect was definitely settled yesterday afternoon. Much correspondence has been exchanged by Mr. Stuart Forbes and Coach Shaughnessy representing McGill and the athletic directors of the leading colleges of the eastern States. Syracuse was given the preference, as they had played the Red and White squad in previous years. They were, however, unable to give any definite date. The Dartmouth schedule is already drawn-up and was announced yesterday so that Mr. Max A. Norton, the graduate manager of Dartmouth College Athletic Council, was able to fix a date suitable to Coach Shaughnessy.

The Hanover college has a first class rugby aggregation as is evidenced by their record of this year. They were defeated by Cornell, but won from such teams as Columbia, Harvard and Brown.

The game is to be played under the American rules. The McGill football mentor has declared himself as much pleased with the coming game with Dartmouth. He stated that as the game is taking place early in the season, both teams will have an even break as far as training and form goes. This contest will also give the local squad the opportunity of playing together in an actual game and help them for their intercollegiate fixtures which follow that at Hanover.

## ELECTIONS HELD BY ATHLETIC CLUB

B. W. and F. Eliminations for College Championships Well Under Way

There was a meeting of the B. W. and F. Club yesterday afternoon at five-thirty o'clock in the field house.

It was very well attended, since there was a large crowd out for the wrestling and fencing practices held from five to six. The meeting was led by H. J. Hines, who announced that it was necessary to elect an assistant manager of the Boxing, Wrestling, and Fencing Club. Snow was elected to this position.

Since Snow has been boxing manager it was necessary to elect somebody else to fill his place. Merritt was accordingly elected. Hines announced that Macnaughton and Fisher had been acting unofficially as secretary-manager and wrestling manager respectively of the B. W. and F.

He said that they had been doing very well in their positions, and he wanted the club to confirm them in their offices. This was unanimously done after the holding of a formal election. The B. W. and F. now stands, as regards officers and coaches, as follows:

Secretary-Manager—Macnaughton  
Assistant Manager—Snow  
Fencing Coach—M. Raimondi  
Boxing Coach—Mr. Robinson  
Wrestling Coach—Mr. Smith  
Fencing Manager—Silverstone  
Boxing Manager—Merritt  
Wrestling Manager—Fisher

The inter-faculty competition has been postponed indefinitely, although it is not far distant. In the meantime the eliminations are going on. The fencing eliminations start Thursday, when the Science and Law fencers will compete with one another. It is expected that last year's champion, Silverstone and Crestohl, will not enter the lists.

Howes announced at yesterday's meeting that he had received a letter from the Y. M. C. A., which stated that a wrestling meet is to be held at the Drummond St. Y. on Wednesday, Dec. 12. It is open to all, and if it is a success, there will be provincial wrestling championships held later in the year. For further particulars regarding this students are advised to consult Coach Smith.

In general it may be said that the work of the B. W. and F. has been very successful thus far, and much interest has been taken in the work of the club. The enthusiasm, as exhibited by the members in turning out in large numbers and their interest in their work the Fencing Club especially, is greater than it has been for years.

### Keen Interest

"You never seem to take any interest in anything I ever do," sobbed the bride.

"Don't be unreasonable my dear," remonstrated her husband. "I laid awake all last night wondering what you put in that cake you made."

—Reville

## R. V. C. SOPHETTES WIN THIRD PLACE

Juniors Are Defeated by One Point

The second R.V.C. basketball game Saturday afternoon was played between the Junior and Sophomore teams, the latter winning by the narrow margin of one point. The final score was 25-24 in favour of second year, and both this and the fact that in the second period the teams were for sometime tied with 21 points each, go to show how closely matched the teams were. For the winners, Miss Turley and Miss Hutchison starred, the former by her splendid shooting, and the latter owing to the excellent support she gave her team through her defence work. Miss McWatters and Miss E. Dunton were the most outstanding members of the Junior team, and in their play showed considerable accuracy and good judgment.

### The First Period

The ball was thrown up at centre and carried to the Third year end, but Miss R. Dunton and Miss Ratner, by some very good combination, worked it down the field to Miss Turley who put in the first basket for Second Year. A moment later Miss Turley dropped another through the ring and made the score 4-0 for Second Year. A member of the Sophomore team fouled. Miss Petrie made the free shot and a moment later scored again. Score, 4-3 for the Second Year. During the next few minutes the Sophomores kept the ball pretty much to themselves, and in spite of the splendid work of the Third Year defence, scored three times, Miss Allen putting in one pretty shot from the side line. Score, 10-3 for Sophomores.

The play now became faster and the ball was kept moving quickly from one end of the field to the other. The Junior forwards, Miss Chalk and Miss Petrie showing very good combination work, scored two baskets. That, however, completed their scoring for the period. The Second Year, passing, dodging, and shooting for the basket, chalked up eight more points and ended the period with a score of 18-7 in their favour.

### The Second Period

In this period the Juniors pulled themselves together, fought their way up until they equalled the Sophomores' score, and at the end the match became really a race against time. At the first the Juniors worked very hard and made five baskets in a very few minutes. Miss E. Dunton and Miss Chalk especially distinguishing themselves. Then Miss Allen, of Second Year, scored on a foul, and Miss Petrie put in another goal for the Juniors, making the score 19-18, Second Year leading. A double foul followed. The Sophomore forward shot and missed, but her opponent's attempt found the basket and made the score 19-19.

In the short time that remained, excitement was at a fever pitch and the spectators cheered continuously as both teams put in one basket after another. Miss Chalk scored after a foul and her team then had a lead of three points, the score being 24-21. However, Miss Turley, not to be outdone, scored twice in the last minute, and, as the ball went back to centre, the whistle blew for time and the match ended with the score 26-24 in favour of the Sophomores.

The following was the line-up:

**JUNIOR**  
Forwards  
E. Petrie  
L. Chalk  
Defence  
M. McWatters  
E. Baker  
Centres  
E. Dunton  
E. Greene  
M. Ratner

At the conclusion of this game a second very evenly matched game was played between the partials of First Year and the Sophs'. second team. The final score of the game was a tie, 10-10. The first basket was made by the Sophs', and at the end of the first period the score stood 4-2 in their favour. Miss G. Scott, centre for the Partial team played an outstanding game.

The second period was very exciting, and though there were several fouls, the play was very even. Both teams fought hard to score but the defence line succeeded in keeping the score down on both sides. A. Carter played a good game at centre for the Sophs', and F. Lenkoff was a credit to her team as guard. L. Robertson and B. Rosen also played a good game for the Partial. Final score, 10-10.

The line-up was as follows:

**PARTIALS**  
Shots  
B. Rosen  
G. Glickman  
Centres  
G. Scott  
B. Friedman  
Defence  
L. Robertson  
M. Archibald

**SOPHOMORES**

Gym surely takes the thrill out of a song when you have to proceed thus to the tune:

Oh, I love—Arms out

In the morning—deep knee bend And I love her, etc., etc.

Editor's Note: You have to go through this to really appreciate it.

## NEW POINTS IN CAVALRY WORK SHOWN

C.O.T.C. Pay Second Visit of Season to St. John's

### MOUNTED PARADE

O.C. Party Notes Improvement in Cavalry Work

A party of seventeen, all ranks of the C. O. T. C. under the command of Captain D. D. McGoun returned Sunday night from St. John's P. Q. where they continued the course in cavalry training begun on the previous trip. Several new points in both mounted and dismounted drill were taken up.

After dinner Saturday afternoon the cadets under one of the sergeant-major instructors were introduced to a few more advanced points in sword exercise than had previously been given. The "engage" and the "point," including the right and left front cavalry and infantry engage and parties were demonstrated and practiced. After an hour's work many of the men were heard to remark that the sword which really weighs three pounds ten ounces seemed to be ten pounds at the least. Following this a lecture on the "Minor Ailments of a Horse" was given the men.

Afternoon stables next occupied the attention of the men who seemed to derive considerable enjoyment from grooming and feeding the horses. After supper Saturday the men were free to do as they pleased. The canten claimed the presence of many while others went to the library either to read or to play billiards. Some few wandered down town patronizing the local film theatre. Lights out at ten o'clock did not see the men asleep. For close on to three hours a series of choice army stories were passed around. Eventually however Morpheus was victorious.

Reveille was sounded at six and a quarter to seven saw the men once more looking after their pet chargers. Several of the steeds became really affectionate caroming about their newly found masters with much vigour.

On completion of the morning meal the men were taken to the riding school under the charge of Q. M. S. I. Dowell, and received instruction in riding and the handling of a horse. The walk, the trot and the canter as well as the different turns were thoroughly gone into, each cadet being shown individually the correct position to adopt while in the saddle. After an hour and a half's work in the riding school the men had a short ride in the adjacent fields.

Sword drill under Sergeant Instructor Hopkinson occupied the attention of the men for an hour Sunday afternoon, and following this came the lecture on "Care and Fitting of Saddlery."

Between supper time Sunday and embarkation at 8.00 p.m. the men were again at liberty.

## SUPPER-MEETING FOR MCGILL MASONS

Sir Arthur Currie Will Give Address

At the regular Supper-Meeting of the McGill University Masonic Club to be held in the Masonic Temple this evening, Wor. Bro. Sir Arthur Currie will be present and will give an address.

Rt. Wor. Bro. Brodie-Brockwell will also speak on a subject of supreme interest to a gathering of this kind, "Speculative Masonry." He is uniquely qualified to talk on this theme. His remarks will doubtless provide food for thought and give stimulus to study in this inexhaustible field.

The Masonic Club was organized but one year ago but it has already justified its existence. It brings all Masons in the University together socially, but, more important, it aims to keep up their interest, to stimulate their growth in Masonry. Nearly sixty were present at the last meeting. The membership is growing and its sphere of influence is increasing.

All Craftsmen within the University, students, staff, and employees are invited to attend this supper.

This supper-meeting will be held in the Masonic Temple, Dorchester St. W., this evening from 6 to 8 p.m. The price is 65 cents.

### CAN YOU BEAT IT?

Grid (to promising Freshette)—Why can't you catch the ball like a man? Co-ed—Oh, men are bigger and easier to catch.

—The Sheaf

"Oh, what a dark room!" "Well, here's where things develop."

—Juggler

Coq: "Fashioners are dead this winter!"

Ed: "Yes, I hear that you are wearing your nose at half past."

—A Good Opinion

## NOTICES

The Captain of the winning team will fill out report of game as per instructions on card obtainable from check room. All players must be physically examined. Attendance will be given.

### BASKETBALL PRACTICES

Will the following men then out for basketball practices for Junior and Intermediate "B" squads at Molson Hall on Wednesday and Friday of this week:—

Crawford, Hahn, Milne, Spitzer, Henry, McKinnon, Martin Woodhouse, Loomie, Fraser, Granik, Rapp, Greenberg, Landry, Stewart, Ferguson, McLean, Butler, Staltner, Glickman, Miller, Curran, Freedman, Patrick, Evans, Burland, Shaw, Golt, Nitcheke, Robbins.

### CLUBS AND SOCIETIES

Would all clubs and societies who would like to have their photographs appear in the 1925 Annual kindly communicate with B. K. Boulton, photographic editor, Plateau 554.

## COMMERCE '27 WINS AT BASKETBALL

Fast Game Played in Freshman-Sophomore League

Commerce '27 won their opening game in the Freshman-Sophomore league by defeating Arts '27 last night by the score of 21-18.

The game was hotly contested throughout and belonged to either team until the final whistle. Arts had the best of the play during the first half, scoring 9 points, while Commerce could only register 5. In the second half, Commerce got a new lease of life and with full time drawing to a close they overcame their opponents' lead, walking off the floor with their first game tucked under their belts.

The feature of the game was the good defensive work of both teams. Little scope was allowed the forwards and, as a result, many long shots were attempted.

For Commerce Hart put up a stellar game not only scoring the major part of the points for his team but also helping out the defensive by falling back at critical moments. Zimand and Silverman divided the honours for Arts, each scoring many points for their side.

Honey refereed the game, in which both teams played clean, few penalties being handed out. The line-up is as follows:

**COMMERCE '27**  
Forwards  
Thompson  
May  
Centre  
Hart  
Defence  
Lewis  
Kelland  
Substitutes  
MacLaren  
Perl  
McDonald

## GROWTH OF OXFORD WOMEN'S COLLEGES

Full Membership Granted in 1920

For nearly eight centuries Oxford has been the mother of learning in the British Empire, and as such she has proved a factor in its development and a unifying power between the Colonies and the Motherland. To many, the remembrance of her towers and "quads", and picturesque old colleges serve as an inspiration, for she has opened her gates to all the different classes of the nation.

For nearly seven hundred years men alone received their education at Oxford, but since women have begun to take their place in the world at large they, too, have been admitted into the University and have taken a prominent place. Their interest was first shown in the men's colleges, when several large bequests were made. When Balliol was founded in part by Devoegulla de Balliol and when even Queen Henrietta-Maria visited the various colleges. Indeed there are a few of the older colleges which do not bear some mark of these visits, either in the form of officials in stone or stained glass portraits. When Cambridge University established women's colleges Oxford felt the need if it them also and the first ones were founded in 1878.

From the start these colleges namely Lady Margaret Hall, Somerville College, St. Hugh's College and St. Hilda's Hall, have been organized as far as possible on similar lines with the ancient ones and have been gradually gathering in prestige and fame. Their graduates have almost all made their mark and follow various kinds of careers in art, architecture, music, drama, and all varieties of scientific research.

In appreciation of their work during the war the University by one generous stroke gave the women of various colleges. Indeed there are at last. The first graduation took place in 1920, so that now they have full standing in the university and may even become professors and members of the Faculties.

But nevertheless, as is usually the case, the women's colleges lack funds and they have usually only the money from the fees of their students. Indeed Oxford itself is in rather a poor financial condition, although in some cases individual colleges are well endowed. As Leacock put it, it is time for another Henry VIII to come along and there is a world wide appeal to all to take an interest in these colleges so that they may be worthy of their affiliation with Oxford and may aid her in her world wide work.

### The Dickens You Don't

Mary: Did you see Oliver Twist, aunt?  
Aunt: Hush, child, you know I never attend those modern dances.

—Pitt Panther.

## DARTMOUTH FENCERS MAY COME TO MCGILL

The Fencing Club has received an offer from Dartmouth University for a competition between McGill and the fencers of that institution. If the proposal is accepted, two Dartmouth men will come here. A special meeting of the Fencing Club, which will be very short is to be held in the Union at one o'clock to discuss this matter. As many as possible are wanted to attend.

Besides planning a match with Dartmouth, which is one of the best known American universities and has a justly famous fencing team, the Fencing Club is beginning to consider the revival of Canadian amateur fencing championships. The last champion was Prof. Nobbs, of McGill who won the cup for the M. A. A. in 1913, and the cup is still in the M. A. A. building on Peel St. The championship meets were, of course, discontinued on account of the war, and with only a little trouble the institution might well be resuscitated.

## DUVAL BEAT GLICKMAN IN BILLIARD CONTEST

In an exciting game of billiards played in the Union yesterday evening, H. Duval beat H. Glickman by 200 to 196. This game was one of the second round of the Union Billiard Tournament.

In the closing innings of the game Glickman was twenty three points behind his opponent, running a pretty fourteen to cut down the lead. This was followed by a five, but Duval got a red winning hazard in lower left hand pocket which gave him excellent position for what was expected to prove the winning stroke, a loser with the red on the top spot and the cue ball on the upper band. The ball was played a trifle hard however, and gave Glickman another chance of which he failed to take advantage. Duval ran out with a nicely executed "follow-through" off the white into the middle left pocket.

Twenty-two was the high run of the game, Duval running this number twice and Glickman once. The players also contributed several more each over the dozen mark. The losing hazard seemed to be the favourite of both players. Duval displayed a liking for "short-jennys" while Glickman showed considerable proficiency at the draw.

Duval used the plain white ball.

He who laughs last laughs last.

# "THE MOLLUSC" PRODUCED BY KNOX PLAYERS

Last Night's Play at Victoria Hall Was Success

ENGLISH COMEDY

Story Deals With the Selfish Woman in Home Life

The players of the Knox Crescent Dramatic Club put on a successful reproduction of the comedy "Mollusc" last night at Victoria Hall, Westmount, before a large audience who received their efforts with much enthusiasm.

The play is set in the living room of Mrs. Baxter's mansion which is situated in a small town just outside of London. The plot of the comedy is built around the indifference of Mrs. Baxter who has inherited a love for an unenergetic life. She is successful in her efforts and is waited on, hand and foot, by her husband and the family governess, Miss Roberts. This habit gains such a hold on Mrs. Baxter that she refuses to play chess or go for walks with her husband but instead she places these duties on Miss Roberts. With the arrival from Colorado of Tom Kemp, her brother, efforts are made to cure her of this vice. After many futile but amusing attempts in which her brother uses force, persuasion, contempt and craftiness to break her away from this habit, he at last attains success by showing her the folly of allowing her husband to be continually with Miss Roberts. The play ends with Mrs. Baxter quite reformed and her brother taking Miss Roberts back to Colorado to be his wife.

The play is delightful throughout and the audience find themselves in a continual state of laughter at the unsuccessful attempts of Tom Kemp to reform Mrs. Baxter with methods which he had boasted could subdue any woman.

The part of Tom Kemp taken by Mr. George Grimson, leading man, was extremely well acted. Mr. Grimson put much feeling into his acting and formed a very favourable impression with the audience.

Miss Pauline White acted the part of Mrs. Baxter very successfully and showed much ability as her part called for a lot of skill in imitating the whims of a spoiled wife.

The remainder of the cast, Mr. Easton and Miss Emma Nelson, also played their parts well and deserve much praise.

The musical selections played during the intervals between scenes were rendered by the Crawford brothers and were very pleasing. It is intended that there will be more plays this season and judging by the success of "Mollusc," the coming plays will be worth seeing.

# MEETING OF CERLE FRANCAIS TO-MORROW

There will be a meeting of the Cercle Francais to-morrow evening at 8.15 in the Reading Room of the Union. This will be the third meeting of the year; the first two meetings having been very successful and enjoyable. It is expected that, as at previous meetings, several members of the French Department will be present. The feature of the evening is to be a debate on the question: "Resolved that woman is inferior to man." The chief purpose of the debate at the Cercle Francais is to give the members an opportunity of improving their ability to think quickly and to express their thoughts spontaneously in public. There is, of course, the chief and additional advantage of doing this in French, a language which is not the mother tongue of the majority of the members of the Cercle.

# EXPLORER OF FAR NORTH WILL SPEAK

(Continued from page 1)  
there then. He repatriated two million destitute Russians who had found their way to Constantinople thus averting a very real danger to Europe. Again, after the recent Greco-Turkish war he solved the problem of one hundred and fifty thousand destitute Greeks by having them returned to their homes. He knows nature and has experienced it in its most destitute and unproductive phases and the same may be said of his experience with men. Most people little realize that he was director of one of the most comprehensive pieces of relief work that the world has ever seen. He is naturally a very interesting speaker being brought to Montreal by the League of Nations, and he will speak before the local branch of the League in the Mount Royal Hotel. It is fitting that Canadians should honor such a great servant of humanity. And in honoring him McGill will be honoring those qualities which men have always regarded as ideal. McGill is fortunate, in that Dr. Nansen will speak after receiving the honorary degree of LL.D., which is to be conferred upon him. Dr. Nansen

# MACCABAEANS HEAR THEIR CHANCELLOR

Gives Aims and Ideals of Menorah

FORCIBLE SPEAKER

Says Intercollegiate is Striving to Produce Distinctive Literature

In his address on "The Jewish Student in American Universities" before the Maccabean Circle Sunday afternoon at the Union, Chancellor Hurwitz, M. A., of the Intercollegiate Menorah Association outlined the aims and ideals of the latter organization of which the Circle is a part. It was his purpose to point out to the members of the Circle what goal they were striving for, that of the realization of a Jewish integrity in America.

To attain this integrity the student must study things Jewish in culture and learning and to this end seek out sources of authority. In reviewing the available literature, the chancellor deplored what little there was for this purpose. There is pedagogical literature for Sunday Schools and books for Theologians but all this is not relevant for the college student or the layman. To create a literature is what the Intercollegiate Menorah is striving for. And with what little funds it has had at its disposal it has done so commendably. Among its efforts is the Menorah Journal which is considered the finest publication of its kind in the English language. It has been highly praised by men like Israel Zangwill. Those who are familiar with the literature contained in the Journal can well appreciate what the Intercollegiate Menorah is accomplishing. Another evidence of Menorah's work is in aiding its chapters to build up libraries such as that of the Maccabean Circle's whose books are in the Redpath Library.

For the Association to function properly it can only see its way clear in establishing a budget of \$100,000 a year. With this money at its disposal it will be able to send the proper lecturers to its member societies, increase the scope of the Menorah Journal and extend its work in those universities where it is already rooted. Supporting this program the Maccabean Executive have passed a resolution to morally aid the Intercollegiate in getting financial aid from Menorah graduates and followers in Montreal. The Chancellor's visit to the Maccabean Circle was an unusual privilege. It has brought the Circle closer to its central council and has given its members the opportunity of coming into contact with a remarkable personality.

# INTERESTING ADDRESS BY PROF. AGGREY

(Continued from page 1)  
The speaker wished to thank McGill for her remarkable contributions to the aid of his country. From McGill have come many great men who have done great things for Africa. Outstanding among these is Dr. Hall, because of whom the coloured race owe much to McGill, even if McGill had never educated coloured men.

And Africa requires the best, he declared, for the people of the east, like the people from Missouri "have to be shown."

There is a great restlessness in Africa to-day, a feeling of self-consciousness among the people, which is a good sign. If these people are left undirected they can work great destruction, but if they are directed they can be a great power for good in the world. "You who have solved many problems," said Prof. Aggrey, "will, with God's help, solve this one." And religion is the great thing that is needed for this work, he said.

Nothing is won by war, for what we win by war we have to keep by war. In the world there should not be "some men up, and some men down; but rather, all men up and no men down. You need us; we need you." A difference in talent or in viewpoint should not spell inferiority or superiority.

"My race pleads to you 'to come over to Macedonia and help us,' and there are many things we have which you have not, which we shall give you if you only help us." In Prof. Aggrey's opinion, the best will never be brought out in the peoples of the world so long as they are opposed to each other. One cannot do without the other.

It is for the educated race to go forth to the great work of civilizing Africa, where one of these men will be as a thousand in his influence. Africa must be civilized, he stated, before the world becomes better, for no chain is stronger than its weakest link.

"You who go forth in this work," stated Prof. Aggrey in conclusion, "will find that peace has its victories, greater, sublimer, than those of war."

# CONVENTION TO MEET AT INDIANAPOLIS

Held Under Auspices of Student Volunteer Movement

NOTED SPEAKERS

S.C.A. Theological Colleges and Churches Are Aiding McGill Delegates

The Ninth Convention of the Student Volunteer Movement will be held at Indianapolis, Indiana, from December 28th, 1923, to January 1st, 1924. The convention is held once during every student generation, the last one at De Moines, Iowa four years ago.

The chief purposes of the Convention have been outlined as follows:

"To realize the critical needs and possibilities of the situation in the world to-day and to consider the responsibilities of the Christian students of the United States and Canada in the light of this situation.

"To consider Christ and His way of life as the hope of all the world.

"To present the foreign missionary enterprise in the light of its achievements and possibilities as an indispensable means of bringing the power of Christ to bear upon the world's needs."

The agenda includes addresses by several world leaders and national representatives from various countries. In addition considerable time will be set apart for forums and discussion groups, thus giving an opportunity for student expression and participation.

The convention will be held under the auspices of the Student Volunteer Movement with the co-operation of the Student Departments of the Y. M. C. A. and Y. W. C. A. and S. C. N. of Canada and the foreign mission boards of Canada and the United States.

Over four hundred Canadians were present at the De Moines Conference in 1920 and it served to some extent as a national convention but this year in the light of the First National Conference held at Toronto last Christmas it would be inadvisable for Canada to be as well represented this year as it was four years ago.

A committee has been working at McGill for some time and already a delegation of about fifteen men and women is assured.

# DR. FERRAND TO SPEAK HERE

President of Cornell to Address Sigma Xi

The Sigma has been especially fortunate this week in securing a well-known authority on the subject of public health in Livingstone Ferrand, A.M., M.D., LL.D., President of Cornell University, Ithaca, N. Y. Dr. Ferrand has a big reputation as an authority on public health particularly that phase which deals with national health. Last year when the university put on a series of luncheons, with speakers on Industrial Medicine, for business men at the Windsor Hotel, Dr. Ferrand was invited to speak but unfortunately at that time he was unable to come to Montreal.

The meeting will be held at 8.30 p.m. tomorrow, Wednesday December 5th, in the large lecture theatre in the Biology Building. Although the Sigma is an honorary graduate fraternity the meetings are open to students and the chairman of the Programme Committee has extended a very cordial invitation to undergraduates of all faculties who care to take advantage of it. In the past there have always been a large number of undergraduates who have taken advantage of the opportunities offered to hear distinguished men, and the officers of the Society have been gratified at this evidence of co-operation and hope that tomorrow and in all future meetings that students will come to hear well-known scientists speak in non-technical language on the interesting aspects of their work.

The Cornell Alumni Society of Montreal is taking advantage of President Ferrand's visit to hold an informal luncheon at the University Club, 183 Mansfield Street, tomorrow, at 1.00 o'clock. Dr. Ferrand will be the guest of honour. Mr. Julian C. Smith, President of the Shawinigan Water and Power Company will be chairman. The luncheon will be quite informal and all Cornell men in Montreal are invited to come and meet Dr. Ferrand.

MINNESOTA—Construction of Minnesota's new stadium will begin early in the spring. It will cost \$6,000,000. It is "U" shaped, which allows for an addition of 7,000 seats to the stand.

YALE—According to the latest statistics, the enrollment of the University has been increased by 500 students, bringing the total to 8,800. This year the graduate school shows the greatest increase.

# CHANGES HAVE BEEN MADE IN HOCKEY RULES

C.I.H.U. Hold Meeting at Hart House

PENALTY RULES

Donald Smith Will Referee Games in Montreal

The Canadian Intercollegiate Hockey Union held their annual meeting at Hart House, University of Toronto, on December the first. G. Quackenbush of McGill was in the chair and the following representatives were present: D. M. Meekson, Varsity; H. Batstone, Secretary-treasurer, Queen's; Dr. Lantier and V. Plomodon, University of Montreal; and cadet K. W. McLeod, R. M. C.

A motion of motion given at the last meeting was adopted embodying elastic changes in the penalty rules. For the first offence a player will be banished to the bench for two minutes, second offence, five minutes. If a player is penalized more than three times he will have to remain on the bench for the remainder of the game.

It was decided that the C. I. H. U. would adopt the O. H. A. playing rules for the coming season of 1923-24.

The form suggested by the referee was adopted and it was decided that it shall be sent in immediately after each game. Donald Smith of W. Small will referee all games taking place in Montreal while H. Jarlow or B. Hewatson will handle the games played in Toronto or Kingston.

A resolution was passed which made it necessary for all intercollegiate records to be sent to a central registry.

Western University was admitted into intermediate hockey and arrangements were made for the Intermediate League, but this will not affect McGill.

The following schedule was drawn up for the coming season:

- Jan. 11th U. of M. at Queen's.
- " 12th Varsity at McGill.
- " 19th Queen's at Varsity.
- " 23rd U. of M. at McGill.
- " 26th Queen's at U. of M.
- Feb. 2nd McGill at Varsity.
- " 6th McGill at U. of M.
- " 8th Varsity at Queen's.
- " 15th McGill at Queen's.
- " 16th Varsity at U. of M.
- " 23rd Queen's at McGill.
- " 23rd U. of M. at Varsity.

If it cannot be arranged for the Queen's-Varsity game to take place on January 19th, it will be played on February 29th.

# SCIENCE MEN HELD DINNER

(Continued from page 1)  
and the cafeteria staff attired in red and white, hurried here and there, performing their task in an excellent manner. All those who attended were loud in their praises of the catering. When the plentiful repast was over, the popular president of the Science Undergraduate Society, after a few welcoming remarks, proposed the toast to "The King" and the National Anthem being sung.

Professor Kelly, on being introduced by the chairman proposed the toast to "Our Fallen Brothers." He said that the name of McGill had not only been made famous by her prowess on the athletic field but by the noble part her sons played in the Great War, in which the Faculty of Science contributed its full quota and more to the call of duty. He then proposed a silent toast.

Allen McCall a well-known member of Sci. '24 proposed the toast to "Our Alma Mater." He said that it was only in their final year that students realized to any great extent what McGill stands for and how much it does for a man if he plays his part. The spirit of the student body, not the buildings is the university. The friendship of the professors and members of the teaching staff were things to be sought for and to be proud of. A lusty McGill yell concluded this toast.

Mitchell then said that Dean Adams was unfortunately unable to attend and in the Dean's place, Dr. Porter and consented to reply to the toast to "Our Alma Mater."

Dr. J. B. Porter remarked that the professors are desirous of the students' friendship and that it was the aim of the staff to assist them. He agreed with Mr. Fraser's remark that there were too many would-be engineers, but that there is no doubt that there are not too many real engineers. Dr. Porter said that he believed that the time was near when an engineering education would be the education to equip anybody for any profession.

Bob Ogilvy of Civil '24 in proposing the toast to "The Faculty" said he hoped that Science would continue to produce real men who are up to the high standard set by their predecessors.

Dr. McKergow was loudly cheered on rising to respond to Ogilvy's toast. On behalf of the faculty he thanked the Science Undergraduate Society for their invitation and told how great a pleasure it was for them to come. He heartily agreed with Ogilvy's ideals for graduates and gradu-

# THEATRE FRANCAISE

George S. Kaufman's Broadway success "Dulcy" is the feature film at the Theatre Francaise this week, and should prove very palatable for film fans.

Unlike the majority of plays, it has not suffered by adaptation to the screen, and although the action is dragged at times, the clever subtleties make up for this deficiency.

The story concerns the adventures of a young married couple, Gordon Smith and his wife Dulcy. The latter, in her attempt to help her husband put over a big business deal with Mr. Forbes, a wealthy oil magnate, provide many amusing situations. Mr. Forbes is invited to spend a week-end with the Smiths, which nearly proves fatal. He is forced to lead a very strenuous athletic program and listen to the ravings of a movie scenarioist. Despite these unfortunate incidents, the deal is finally concluded, and conjugal bliss is restored.

Comrade Talmadge as Dulcy radiates her charming personality in a role that fits her like a glove. Jack Mulhall and Walter Gillingwater play their respective roles of Gordon Smith and Mr. Forbes very satisfactorily and Dulcy's brother Bill, who has graduated from college, and is just recovering, is very amusing.

The Sport Review and a very feeble comedy, "The Handy Men", complete the Bill.

# CHESS CLUB TO HEAR TALK BY PROF. SLACK

To-night at eight o'clock Prof. Slack will give a chess demonstration at the Union in the lounge room. He will discuss current chess problems. This is to be done in place of a chess tournament between the professors and the students which was to be held to-night but has been postponed two weeks ahead, on account of examinations being held now.

The Chess Club meets once a week for the tournament eliminations. A team of six students will be chosen from the eliminations to combat a team of six professors one fortnight from to-night. There is to be a regular meeting at five o'clock to-day.

# CO-ED'S LAMENT

I had been keeping company  
For over, and I  
Loved him dearly, so  
I was impatient and anxious  
For him to propose.  
However I am determined not to  
Show the slightest concern about his  
Proposal (but if he ever did propose)  
I would with feigned surprise,  
"This is so sudden!"  
Then he would beg  
And plead  
After a time, I would  
Reluctantly give my consent.  
One day, Johnny came to me.  
He looked pale and nervous  
He fussed and fumed, until  
Finally he blurted out,  
"N-Norah, will you—eh—  
M-m-marry me?"  
And at that longed-for moment  
I became so flustered,  
That instead of "Oh, Johnny,  
This is so sudden!"  
I sighed—and hastily  
Cried out  
"At last!"

I. D.  
New York Univ.

ates-to-be. "Don't be a \$2,000 a year man," he said.

Ogilvy Leslie proposed the toast to "Our Sister Universities," remarking how closely the different universities were connected. Carswell of Toronto Varsity, Roberts of Queens, and Ethier of the U. of M., replied to this toast and thanked the Society for their invitation and hospitality. They all agreed that this function would do much to foster the co-operation of the universities.

Mr. Fraser Keith, of the Engineering Institute, was next introduced by the chairman. Mr. Fraser, said he agreed with Dr. Porter and Dr. McKergow. He then went on to congratulate the undergrads on their splendid arrangements and breaking into his subject he gave a brief history of Col. Dennis. Col. Dennis, C.M.G., is a Dominion Land Surveyor and is head of the Department of Development of the C. P. R. During the war Col. Dennis did great work recruiting in the United States.

The chairman on the conclusion of Mr. Fraser's short talk introduced Col. Dennis who announced that he would speak on "Development of Canada." He treated his subject in a masterly fashion, showing his complete knowledge of it. He dealt with the financial position of Canada before and after the war, with Canada's part in the recent great conflict, her future in the realm of commerce, her present needs and the duty of Canadian citizens to their country.

Mitchell then called on Errol Armaron, president of the Students' Council, to address the gathering before it broke up. Armaron said that he was in Dr. Leacock's position. He was here to wind up the clock and put the cat out. He thanked Science for coming to the Union for their banquet and hoped they would continue to do so.

# BASKETEERS INVADE M.A.A.A. ON SATURDAY

McGill Seniors and M.S.P.E. Team Play Exhibitions

AT PEEL ST.

Many of Last Year's Players Will be Seen in Action Again

Last night the Senior basketball squad had a strenuous work-out at the Montreal High School. Coach Van Wagner is rounding his men rapidly into shape for Saturday's game against M. A. A. A.

A double-header is scheduled for Saturday at the M. A. A. A. Club-house. At 8 o'clock the M. S. P. E. team will play the M. A. A. A. Senior girls in an exhibition game, and a keen contest is promised. Both teams have been practising consistently for some time, and the result should be a most interesting game. Following the girls' game, the senior McGill squad will meet the senior M. A. A. A. team. In the M. A. A. A. A. team, last year's champions will be up against a strong aggregation, composed of the best men the two senior teams the M. A. A. A. had in the City League last year. However, with the exception of one or two men, the same men will play for McGill this year, as were so successful last year. This will also be an exhibition game. Spalding's rules will be followed. A great interest is being taken in basketball this year. The tickets for Saturday's games have been selling well, but a few are still available for any who have not already secured them. These may be obtained at the Union at special prices, namely: 75 cents reserved seats for 55 cents, and 55 cent general admission for 35 cents. This is the only opportunity the student body will have of seeing the senior team in action before the intercollegiate schedule starts.

Less than a week remains before the City League games will begin. On Monday, December the tenth, McGill Intermediates will play their first schedule game, and on Wednesday the 12th the Juniors will start their series. So far the schedules are not available but these will be printed in a day or two.

Coach Doyle and Coach Manley have been working their men hard the last few practices. The teams are lining up well, but any players around college who have not turned out yet this season, still have a chance to make a place on the Intermediate or Junior teams. This applies particularly to the Junior team. Men for this team must be under twenty years' age on January 1st, 1924.

A change has been made in the practice hours for class teams taking part in the Freshman-Sophomore League. The corrected list is as follows:

Arts I. Tues. 4 p.m.  
Arts II. Tues. 4 p.m.  
Dent. Thurs. 1 p.m.  
Dent II. Wed. 11 a.m.  
Med. I. Wed. 1 p.m.  
Comm. I. Fri. 4 p.m.  
Sci. I. Sat. 1 p.m.  
Sci. II. Sat. 1 p.m.  
Theo. I. Sat. 9 a.m.  
Phar. I. Thurs. 4 p.m.  
Comm. II. and Med. II. can arrange for practice hours by applying to Coach Van Wagner.

# MEDICALS ADRESSED BY DR. C. S. LEWIS

(Continued from page 1)  
smaller ones he was lost. In 1660 Malpighi described the capillaries in the lung of a frog but again he found no connection between the arteries and veins. It fell to Leewenhock to describe this connection which he did with the aid of his microscope using the tail of a fish. Lastly he described the red blood cells and their carrying of blood pigment. Thus, Leewenhock was referred to as the father of Parasitology and Bacteriology.

Edward Jenner, who was born in Berkeley, Gloucestershire, was the founder of vaccination. He was the son of a clergyman and at the age of 18 was apprenticed to a country doctor. In 1770 he went to London and became a resident pupil in the home of John Hunter. After returning to the country he began a mysterious correspondence with Hunter, which caused him great trouble later. After the latter's death Jenner published some amazing reports which were thought to be discovered by Hunter and a Commission was appointed by the Royal Society to investigate. On hearing of this Jenner immediately burned all the letters obtained from Hunter and thus some extremely valuable contributions to scientific medicine were lost. Jenner was the first to discover that agria pectoris was due to coronary artery disease. Also at this time in England there were great epidemics of small-pox and Jenner set to work to discover the cause. He found that on injecting the serum of a person who had previously had small-pox into another person the latter did not develop the disease. Jenner was also a poet and musician and a very interesting conversationalist.

# THE IMPERIAL

The Imperial Theatre is modest when it advertises this week's attraction as "Another Good Show This Week,"—for judging from the applause rendered, this bill is a real topnotcher. Harry Salter and his orchestra display a varied and melodious programme, combining favourite standard selections and new jazz pieces with a wonderfully pleasing effect.

Claire and Atwood open the vaudeville with a very good tumbling act, presenting a skilful turn, and drawing rounds of hand-clapping for their fine performance. Mac Francis follows with an attractive repertoire, well-rendered with a sweet, mellow voice, crowning her entertainment with "Basket of Roses."

Eastman and Moore feature a little skit, "Bargains." The scene starts in a departmental store and ends with the couple at the altar, after the little shop-girl has been transformed by the floor-walker into a bride.

A delightful turn of song, music and patter is presented by Albright and Harte, while another turn along the same lines, but different, original and applause-scoring is heard from Marie Walsh and Frank Ellis who carry the audience away with their song, "Ours Is a Nice Little House, Ours Is."

Some wonderful scenic effects are seen in the film presentation "Pioneer Trails," the scenes of which are laid in sunny California during the gold rush in '49, and in the after years. A News Film and "Topics of the Day" round out a good evening's entertainment.

# MEDICINE SOPHS WIN FROM SCIENCE

Medicine '28 Wins in Basketball From Science '26 With 17-14 Score

At a hotly contested basketball game yesterday at six-thirty in Moisson's Hall, Medicine '28 succeeded in winning from Science '26 with a lead of three points, the score being 17-14. This game was immediately followed by one between Arts '27 and Commerce '27, in which the latter was victorious. Willard Mace refereed the battle between the Medicals and the Scientists.

Medicine started by getting two baskets, and after this the two teams gained points equally, and Science could not catch up with their opponents. McKeyes starred for Science '26, while Shotton was the stellar representative for the second year Medicine. The line-up of the game follows below:

| SCIENCE '26       | MEDICINE '28 |
|-------------------|--------------|
| Upton . . . . .   | R. Forward   |
| Craig . . . . .   | L. Forward   |
|                   | Centre       |
| Macklin . . . . . | Shotton      |
| Jones . . . . .   |              |
| McKeyes . . . . . | R. Guard     |
|                   | Greenberg    |
|                   | L. Guard     |
| Gauvin . . . . .  | McDonald     |
|                   | Substitutes  |
| Airey . . . . .   | Basson       |

Science '26 scored four field goals and six fouls, while Medicine '28 made eight field goals and one foul.

ILLINOIS—The Daily Illini will award a trophy to the best high school paper shown in the exhibit in connection with the convention of the Illinois State High School Press association, to be held Nov. 22-24. The award will be a large trophy bearing the seal of the University of Illinois.

Lastly the speaker dwelt on the life of Louis Pasteur, the great French Scientist, who opened up the field of bacteriology. He was born in the south-east of France and in early life he was sent to Paris to attend school where he came under the great Chemist, Dumas. He first studied fermentation of wine and beer due to the fact that although at first the wine was excellent it rapidly fermented. He found that mixed up with the yeast cells were other organisms which rapidly multiplied but if he heated the wine to 60 degrees it remained unfermented. This is known now as "Pasterization." Pasteur was next called to the condition of silk worms. A disease had spread among them and the whole industry was threatened. He studied this disease and within five years had completely rid the country of its scourge. He then began work on anthrax and the development of vaccines and is remembered for the discovery of hydrophobia. He found that the lesion occurred in the central nervous system. It is interesting to note that Pasteur not only found the cause of various disorders but in every case gave a cure. His character showed a constant desire to do good and his power to attract men to work with him was remarkable.

In conclusion the speaker pointed out that each of these men formed a constructive stone in the field of Preventive Medicine.

Following the address of the evening refreshments of the usual high order were served.
